

## Job Description

**Job Title:** Journeyman Pipe Fitter  
**Employee Name:**  
**Date:** July 29, 2021  
**Reports To:** Designated Project Foreman and/or Project Manager (Project-based)

### Job Summary:

Taking written and verbal instructions, a pipe fitter creates ISO's, lays out, takes measurements, installs, inspects, and maintains process pipe systems and equipment to ensure operation as specified and in compliance with contract documents, customer's good manufacturing practices, and Occupational Safety and Health Administration (OSHA).

### Essential Duties and Responsibilities

- Coordinates with project manager/foreman to configure pipe systems layout
- Lay out full scale drawings of pipe systems, supports and related equipment
- Cut pipe using saws, pipe cutter, cutting torch, and pipe cutting machines
- Connects pipes using threaded, caulked, soldered, brazed, fused, or cemented joints and hand tools
- Installs and maintains hydraulic and pneumatic components of machines and equipment, such as pumps and cylinders using hand tools
- Complies with industry safety norms and standards of working. Reports all unsafe acts and near misses to the Safety Manager and on-site Project Manager/Foreman
- Punctuality - ability to begin working on time and take breaks within the allotted break and lunch periods
- Prepared to travel to wherever the job takes you. This position will involve long durations of work in designated destinations.
- Other duties as assigned

### Additional Job Requirements

- Ability to draw ISOs
- Knowledge of machines and tools, including their designs, uses, and maintenance
- Uses test equipment to locate leaks in equipment subjected to pressure and/or vacuum
- Ability to read, write, and perform remedial mathematics
- Ability to effectively manage time and complete all delegated work within the specified time
- Open to constructive feedback
- Flexibility to take on additional responsibilities if requested
- Abide by our customers' Work Rules and Good Manufacturing Practices (GMPs)
- Respectful of our customers, vendors, and coworkers

- Ability to operate powered industrial trucks such as a counterbalance forklift, scissor lifts, and JLG
- Ability to maintain a positive outlook during daily operations and tasks
- Participate in proactive team efforts to reach company goals
- Must be able to climb and work at high elevations
- Possession of a valid driver's license or a means to get to and from work each day
- Possession/access to personal hand tools
- Other duties as assigned by the area supervisor

**Supervisory Responsibility**

This position has no supervisory responsibilities

**Physical Requirements** of this job include standing, kneeling, crouching, climbing, pushing/pulling, and walking. The typical work schedule is five or six 10-hour days but depending on our customers' needs could be up to seven 12-hour days. Job duties require a physical activity level that is moderate to high. Reasonable accommodations may be made in limited situations to enable individuals with disabilities to perform the essential functions.
