Finance Your Equipment Purchase

SCL Equipment Finance makes it easy to invest in capital equipment from a single piece of equipment to an entire process system. The financing is straight forward and tailored to meet your needs. We provide exceptional service and fast approvals.

The Benefits of Financing

- Preserve working capital
- Spread your capital expenditures out with predictable low monthly payments
- Take advantage of tax regulations (ability to depreciate the equipment value and the interest)
- Lower upfront costs

What You Can Finance

- All major equipment such as tanks, mixers, blenders and valve assemblies
- Skids
- Automated control systems
- Energy efficiency upgrades
- Complete production lines

Who is Eligible to Finance?

We have financing options for startups as well as established food and beverage processors. Financing terms are available for companies with all credit profiles.

We provide financing for:

- Sole proprietors
- Partnerships
- Corporations

What Collateral Will I Need to Provide?

The collateral is the equipment itself. No additional collateral is required.

What is the Difference Between “Equipment Financing,” “Capital Lease” and “Equipment Leasing?”

When you finance your equipment through our company, you will be financing the equipment until it is paid off. Once the equipment is paid off and all payments are made in full, you own the equipment/collateral.

Who is SCL Equipment Finance?

SCL Equipment Finance is a Division of Southern California Leasing Inc. We facilitate equipment financing to many different industries including Food and Beverage. We provide the best financing options and flexible financing structures to meet your needs. Check out our website at: <https://sclEquipmentfinance.com/>
